## Ulead® VideoStudio® 11

Powerful Video Editing and DVD Authoring Made Easy

### Features & Benefits

**Ulead® VideoStudio® 11** is easy-to-use video editing and DVD authoring software that lets anyone create and share great-looking videos, slideshows and DVDs. Work quickly with timesaving Wizards, or get creative with easy hands-on tools. Put your video on DVD, tape or the Web, to share with family and friends.

#### Imagine the Movies You'll Make

**VideoStudio Editor** gives you all the tools you need to produce great-looking home movies. Follow an easy, step-by-step workflow that lets you spend your time being creative rather than learning technical editing.

**Movie Wizard** is ideal for users new to video editing. Select from attractive themes and let auto-editing create a professional opening sequence for you. Instantly produce entertaining photo slideshows with Smart Pan & Zoom. You'll have a complete movie in only three steps.

**DV-to-DVD Wizard™** The fastest way from DV to DVD. Just hook up your camcorder and choose the clips you want. In just two steps you have a finished DVD complete with menus, titles, transitions and music.

**Welcome Screen** makes things simple from the word go.

#### Unmatched Ease of Use

*An easy-to-use interface matched with powerful technology under the hood is the Ulead hallmark.*

##### Easy, flexible user interface

- **Preview Window** can be positioned left or right, for greater flexibility.
- **Expandable Preview Screen** features one of the largest preview windows of any video editor, so you can see how your finished movie will look.
- **Storyboard and Timeline views** can be switched to easily rearrange clips and manage transitions and titles.
- **"My Favorites" folder** in Transitions Folder makes it easier to find the most-used transitions quickly.

- **Timeline Zoom Control** lets you zoom into the details for a closer look or zoom out to get an overall view of your video project.
- **Audio View** for precise mixing of clip, overlay, narration and music tracks.
- **Audio Waveform Display** for easy synching, editing to music and checking audio levels.
- **Library Organization** - Easily sort your videos, images and audio clips by date, time or file name.
- **Drag and Drop** images and video clips directly from Windows Explorer to the library for the fastest way to gather project media.
- **Easy capture options** provide a no-hassle capture experience. Select the capture source and view only the options you need.
- **Multi-Trim Editor**
  - Extract **multiple** segments from videos for further editing.
  - **AccuCut Editing** with Timeline Zoom lets you quickly find the exact frame to start trimming.
  - **Jog & Shuttle Control** speeds navigation through video clips.
- **Zoom in on Keyframes** for frame-accurate control of filters and effects.

##### Fix Common Video problems easily

- **New! Auto Color & Tone** will auto-correct the color and tone of videos that were recorded in low light or less than perfect white balance conditions.
- **New! DeBlock Filter** cleans up video with blocky compression artifacts, such as movies copied from VCD.
- **New! DeSnow Filter** removes digital noise from your video.
- **Anti-Shake filter** stabilizes video for better looking movies.
- **Enhance Lighting filter** lets you add "fill light" to an image with a dark foreground, without burning out the highlights.

##### Tools for Creative Power

- **New! Overlay videos** can have transparency, mask and chroma key effects combined and can be cropped on-screen to remove any unwanted elements.
- **New! Preview Window for overlays** shows original overlay image, making it easier to adjust chroma key settings.
- **Chroma Key** lets you create TV magic the way the pros do. Shoot your video subject against any uniform

color and then superimpose over a shot of any background.

- **Flash Animation Overlays** provide animated objects or clips as motion overlays.
- **Rotate** video and images to add perspective effects to overlays.
- **Video Masks** frame video clips with attractive shapes.
- **Adjustable Playback Speed** allows you to create slow and fast motion clips and videos, without altering the pitch of the audio.
- **Reverse Playback** creates a fun visual effect by playing your video backwards.
- **Ripple Editing** makes removing portions of clips and arranging scenes easier, as it automatically adjusts the positions of elements like audio, titles and overlays in relation to the video.
- **Place cue marks** on the timeline to easily mark where you want a title to start, or perhaps some music to come in.
- **DVD title chapter points** can be added directly to the timeline for a more intuitive way to set DVD navigation.
- **Auto Save** automatically saves your project at preset time intervals so you can always recover your work if needed
- **Save Image** lets you grab any frame from your video as a still image. Use as title backgrounds or menus to personalize your videos even more.

## New Encoding Tools

- **New! MPEG Optimizer Does the Math for You**  
**MPEG Optimizer** analyzes the bitrates of all clips on the timeline, and suggests encoding settings to ensure the least re-rendering for the best quality and speed.
- **New! Safely Pause** rendering at any time when you need to do something that requires more PC resources.
- **New! Smart Project Package**  
Free up disc space by exporting your trimmed and edited project to a new folder, for efficient archiving of only the clips that you have used in your final movie.

## Enhanced! Movie Wizard

- **New! Advanced Movie Wizard Templates**
  - Automatically create **exciting movie-style openings** using your video clips.
  - **Personalize videos** with your own background music and titles.
  - **Quickly trim video with Multi-Trim editor**, including **AccuCut**.
  - **Split by Scene** automatically detects scene changes in your video while you are capturing, or in clips already captured and in the library.
- **Smart Pan & Zoom** automatically recognizes faces in photos and creates dynamic slideshows.

## Enhanced DV-to-DVD Wizard

- **Create DVDs faster than ever**
  - **Transfer** an entire DV tape to DVD in one step.
  - **Backup** your DV tapes or archive footage with the blank template option.
- **Enhanced! DV Quick Scan**
  - **New! Auto Subtitle Track** – Automatically capture video date & time and view as a subtitle track you can turn on or off.
  - **Scan** your DV tape to generate a thumbnail list of all your clips. Then select and batch capture only the clips you want.
  - **Save** and load tape information to recapture in future.
  - **Print** out DV tape Scene Digests to keep a record of the content on your tapes.
  - **New! Auto Subtitles in DV-to-DVD Wizard**  
Automatically add DV date and timestamp as you capture your videos, to instantly identify when it was shot.

## Pro-Quality Titles and Subtitles

- **New! Rotate titles** directly in the preview window to any angle you like.
- **New! Sync subtitles** to downloaded movies, which often have subtitle files available in .srt format that will automatically synch to the video when burning a DVD.
- **New! Multi-language titles** such as double-byte Chinese, Japanese and Korean characters.
- **New! Unicode character set** supported to simplify multi-language titles.
- Create **multiple titles** that appear at the same time. Position, format and animate each title independently.
- **Edit titles on-screen.** Mix fonts, character sizes & colors.
- **Line border stroking/outlining** of on-screen text for cleaner, more legible titles.
- **Apply text backdrops** with solid or color gradients and transparency.
- **Animate titles** in any of 8 motion styles. Use ready-to-go presets or customize animation settings. Set how titles enter, exit and pause on-screen.
- **Align text** to screen safe area, and create vertical titles.
- **Organize titles in libraries** and import and export them for re-use.
- **Import and export project titles** in standard subtitle format.

## More Brilliant Filters and Effects

- **Hundreds of customizable Effects, Filters, and Transitions** let you create professional-looking movies. Simply drag and drop preset effects from the Library onto any selected clip or customize the effects to personalize your movie.
- **Transition Effects** make your shots flow smoothly from one to the next. Choose from over 120 fully-customizable transitions

- **Masks** are great transitions that offer interesting patterns for moving from shot to shot.
- **Flashback** is a fun way to give your video that Hollywood “flashback” effect.
- **Creative Video Filters**
  - **Fish Eye** filter applies fish-eye, bubble-like distortion to video clips.
  - **Particle Filters** create a unique effect by overlaying animated **Clouds, Rain, Lightning** or **Bubbles**.
  - **Video Pan & Zoom** lets you pan across and zoom in on the details of your favorite video clips.
  - **Strobe Motion Filter** selectively speeds up or slows down portions of a video clip.
  - **Ghost Motion Filter** creates a ghosting effect that is great for making kids’ “ghost” movies.

### Great Sound for Great Videos

- **Audio View** for precise mixing of clip, overlay, narration and music tracks.
- **Audio Waveform Display** for easy synching, editing to music and checking audio levels.
- **Audio Rubber-Banding** lets you adjust sound levels of your video, overlays, narration and background music directly in Audio view.
- **Import from CD Audio** supports CD information from the Internet, such as track titles, artists, genres and dates.
- **SmartSound® Auto Music Maker** features an advanced music engine that lets you create an infinite variety of unique royalty-free tunes to perfectly fit the style and duration of your project.
- **Time Stretch** lets you change the duration of the video or audio clips to match other material on the timeline without adversely affecting the audio pitch.
- **Audio Filters** such as Audio Normalization, Remove Noise, Amplify Volume, Long Echo, and Stadium Effect help fix audio problems or add just the right touch to enhanced audio tracks.
- **Pitch Shift** filter raises or lowers the key of the audio clips without altering the length.
- **Volume Leveling** evens out the volume of loud and soft video clips to ensure your movie’s volume is consistent across all clips.
- **Audio Reverb** adds a sense of acoustic space to your soundtracks.
- **Duplicate Left or Right Channels** gives you the option of duplicating a single (microphone) channel into right and left audio channels, for full stereo sound.

### Enhanced Menus and Authoring

- **Easy-to-use menu templates** give polish to your production. Select from over 100 motion menus in a range of styles for any occasion.
- **Modify and personalize** menus with your own photos, video and titles.
- **16:9 Widescreen and 4:3** standard menus for playback on any TV.
- **Thumbnail menus** – Traditional-style menus in a range of layouts with motion buttons.

- **SmartScene Menus** – Unique menus with project titles sharing a single large preview area, rather than appearing as separate motion buttons.
- **Text menus** – Slick-looking menus with text-only buttons.
- **Freely position** text, frames and button objects anywhere on your menu, to match your composition with the background.
- **Rotatable text** can be adjusted to any angle for more eye-catching menus.
- **Menu transitions** – Create transitions just like Hollywood DVDs. Set **menu-in** and **menu-out** transitions to smoothly go into the next title or menus.
- **Motion filters** create movement even on static menu. Select an image for a background, then bring it to life with ripples, spotlight effects or pan and zooms.
- **Preview menu** behavior at any time in the authoring process.
- **Switch between 4:3 and 16:9** authoring modes and between standard and high-definition output at any time.
- **Timeline Chapter Point Bar** enables you to add title chapter points directly to the timeline for a more intuitive way to set DVD organization.

### The Most Complete Solution

Support for all popular formats means that you can work with standard and high-definition video, images and audio.

- **Use virtually any video source**
  - DV camcorders
  - DVD camcorders
  - JVC® hard drive camcorder MOD file format support
  - USB camcorder device control
  - Mobile phones
  - Set-top DVD recorders
  - Digital & analog TV tuners
  - VCRs
  - Webcams
  - **New!** Share your movies on the go with Zune™.
- **Comprehensive output options** let you save your final version into most popular video formats. Audio and image files can also be exported in any of the supported formats.
- **Batch Convert** saves time when you need to change multiple video files from one format to another.
- **DivX® Support** - Import and export DivX-encoded video with an appropriate codec.
- **Video E-mail** compresses short movies into e-mail friendly versions and automatically sends them to recipients directly from within the program.
- **Streaming Video** converts your finished videos to compact Web movies in Windows Media®, RealVideo® or QuickTime® format for easy access over the Internet.
- **Windows Vista™, XP64 and MCE** Support for the latest generation systems.

- **Output to Any Disc**  
Burn CDs, DVDs and high-definition discs. Support for DVD+R/RW and -R/RW, single- and dual-layer burning.
- **Intel® Core 2 Duo™ support** – enjoy improved performance from dual-core CPUs.

### Bonus Features

- **Neptune MediaShare** provides you with a ready space on the Web where you can share movies with your family and friends.
- **Movie Screensaver** creates Windows® screensavers based on your favorite slideshow or video clips complete with music.

---

### System Requirements

- Intel® Pentium® 4 (equivalent) or higher recommended
- Microsoft® Windows® XP SP2 Home Edition/Professional, Windows® XP Media Center Edition, Windows® XP Professional x64 Edition, Windows Vista™
- 512 MB (Depending on the video capture device used, 1GB RAM may be recommended)
- 1 GB of available hard disk space for program installation
- Windows-compatible sound card (multi-channel sound card for surround sound support recommended)
- Windows-compatible CD-ROM for installation

### Input/Output Device Support

- 1394 FireWire cards for use with DV/D8 camcorders
- Support for OHCI Compliant IEEE-1394 and 1394 Adaptec 8940/ 8945
- Analog capture cards for analog camcorders (VFW & WDM support for XP and Broadcast Driver Architecture support for Vista)
- Analog and Digital TV capture device (Broadcast Driver Architecture support)
- USB capture devices, PC cameras, and DVD/hard drive camcorders
- Windows® compatible DVD-R/RW, DVD+R/RW, DVD-RAM or CD-R/RW drive
- WMV Pocket PC, WMV Smartphone, Microsoft Zune™

### Input File Format Support

- Video: AVI, MPEG-1, MPEG-2, QuickTime, Windows Media Format, DVR- MS, MOD (JVC MOD File Format), 3GPP\*\*, 3GPP2\*\*
- Audio: Dolby Digital Stereo, MP3, MPA, QuickTime, WAV, Windows Media Format.
- Images: BMP, CLP, CUR, EPS, FAX, FPX, GIF87a, ICO, IFF, IMG, JP2, JPC, JPG, PCD, PCT, PCX, PIC, PNG, PSD, PXR, RAS, SCT, SHG, TGA, TIF/TIFF, UFO, UFP, WMF
- Disc: DVD, Video CD (VCD), Super Video CD (SVCD)

### Output File Format Support

- Video: AVI, MPEG-1, MPEG-2, QuickTime, Real Media, Windows Media Format, 3GPP\*\*, 3GPP2\*\*
- Audio: Dolby Digital Stereo, MPA, WAV, Windows Media Format.
- Images: BMP, JPG
- Disc: DVD, Video CD (VCD), Super Video CD (SVCD) movie title
- Media: CD-R/RW, DVD-R/RW, DVD+R/RW, DVD-R Dual Layer, DVD+R Double Layer.

\*\* Plug-in required
